Professional Profile

An accomplished software developer with over five years of commercial experience, committed to building innovative and reliable applications that enhance user experiences using .NET development, specialising in C#, MAUI/Xamarin, JS, ReactNative and NodeJS for building robust, secure, and user-friendly applications. Proficient in adhering to SOLID principles and best programming practices to deliver high-quality, maintainable code. Experienced in Android development, including UI design, application lifecycle management, and system integration. Adept at working independently or collaboratively in dynamic, agile environments, with a proven track record of driving code development, deployment, and observability improvements. Strong communication, problem-solving, and interpersonal skills, complemented by a solid academic background in accounting and financial systems, enhance data-driven decision-making in technical projects. I see myself as a good fit for this position because I have a deep experience in the accounting and financial field, with over 10 years of expertise and conducting experience.

Key Skills

- **Technical Expertise:** Proficient in .NET, C#, MAUI/Xamarin, iOS and Android development (UI, application lifecycle, system services).
- **Programming Practices:** Strong adherence to SOLID principles, clean code, and best practices for scalable and maintainable software.
- **Agile Development:** Experienced in dynamic, agile environments, delivering high-quality solutions under tight deadlines.
- **DevOps & Observability:** Skilled in improving deployment pipelines, support processes, and observability for enhanced system performance.
- **Software Tools:** Proficient in Visual Studio, Git, DevOps, Xero, Sage, QuickBooks, SQL, and MS Office (Excel, Word).
- **Communication & Teamwork:** Excellent interpersonal and team collaboration skills, with experience in cross-functional teams.
- **Languages:** Fluent in English and Arabic.
- **Problem-Solving:** Strong analytical skills for optimising workflows and resolving complex technical challenges.

Employment History

Accountant, FinTech Developer

Remits International | Birmingham, UK | 2024 – 2025

- Developed and maintained cross-platform applications using .NET, C#, and MAUI/Xamarin, focusing on Android platforms with robust UI and secure system integrations.
- Applied SOLID principles to ensure clean, maintainable, and scalable codebases, enhancing application performance and reliability.
- Implemented observability tools to monitor application performance, reducing downtime and improving user experience.
- Integrated financial data processing modules with accounting software (Sage), streamlining transaction reconciliation and reporting.
- Worked independently on feature development and took direction from senior developers to meet project deadlines and quality standards.

Freelance Mobile App Developer & Database Architect

Independent Contractor | Birmingham, UK | 2020 – 2024

- Designed and developed mobile applications for estate agents and remittance companies using React Native, delivering cross-platform solutions for iOS and Android.
- Built comprehensive database systems using SQL Server and MongoDB to support property listings, client management, and international money transfer transactions.
- Developed RESTful APIs using Node.js and Express to integrate mobile applications with backend systems, enabling real-time data synchronization.
- Implemented secure payment processing systems and compliance features for remittance applications, adhering to financial regulations and industry standards.
- Created property search and management features for estate agent apps, including map integration, filter systems, and client communication tools.
- Optimized database performance through indexing strategies and query optimization, significantly improving application response times and user experience.

Administrative and Accounting Team Leader

Soth Oil Company | 2001 – 2019

- Led the implementation of ERP systems with custom .NET-based modules to automate accounting and financial reporting processes, improving efficiency by 30%.
- Developed internal tools using C# to manage data workflows, including attendance systems and financial reconciliation processes.

- Collaborated with cross-functional teams to optimise administrative processes, demonstrating strong problem-solving and communication skills.
- Prepared and analysed financial reports, leveraging SQL for data querying and integration with accounting software.

Education

South City

Diploma in Web Design

South City College | UK | 2022-2023

MSc Accounting

University of Liverpool | UK | 2018 – 2019

- Focused on financial systems, data analysis, and software integration for accounting processes, enhancing technical and analytical skills.
- Developed SQL and data management proficiency, applicable to software development and financial application integrations.

BA Accounting

University of Basra | 2003 – 2007

- Gained foundational knowledge in data processing, financial systems, and analytical problem-solving, supporting technical development skills.

Additional Information

- **Certifications:** Microsoft Certified: Azure Fundamentals (2024), Xamarin Certified Mobile Developer (2023).
- **Technical Proficiencies:** .NET, C#, MAUI/Xamarin, Android SDK, Visual Studio, Git, SQL, Xero, Sage, QuickBooks, MS Office.
- **Visa Status:** Indefinite Leave to Remain in the UK (no sponsorship required).
- **Languages:** Fluent in English and Arabic.
- **Interests:** Passionate about open-source contributions, staying updated with .NET and Android development trends, and mentoring junior developers.
